DETAILED ACTION

1. Applicants' response filed on 1/21/2011 amended independent claims 1 and 10, dependent claims 4, 6, 8-9, and 13, and cancelled claims 5, 7 and 14-16. Applicants' amendments in light of their arguments are persuasive and, therefore, the claim objections, and the 35 USC 103 rejection over Kawahara in view of Shimomura from the office action mailed on 8/23/2010 is withdrawn. Applicants did not submit translations to the non-patent literature documents from the IDS' filed on 6/9/2010 and 7/15/2010 therefore these documents have been placed in the file but have not been considered. For the reasons stated below, claims 1, 4, 6, 8-13 and 17 are in allowable condition.

Information Disclosure Statement

2. The information disclosure statements filed on 6/9/2010 and 7/15/2010 fail to comply with 37 CFR 1.97(c) because the non-patent literature documents, Japanese Office Actions dated 5/11/2010 and 6/29/2010, lack a statement as specified in 37 FR 1.97(e). They have been placed in the application file, but the information referred to therein has not been considered.

Examiners Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

A) At the beginning of line 1 on page 1 of the specification:

Please ADD the phrase, "This application is a 371 of PCT/JP04/10840, filed July, 29th, 2004.

B) From claims 1 and 10:

Please CANCEL "polyol esters" and "polyoxyalkylene glycols" from the list of base oils.

Spoke with Hojung Cho on 2/1/2011 and she approved the above mentioned amendments.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

As evidenced by the prior art references of record, it is well known in the art for refrigeration compositions to comprise base oils, phosphorothionates, phosphates, oiliness agents and additional additives. Applicants', however, have amended their claims to "consisting of" language which means that the claims are close-ended and additional additives besides the ones enumerated in the claims cannot be present in the prior art compositions.

Kawahara discloses base oils as necessary components that are derived from branched-chain carboxylic acids which are not recited in instant claims 1 and 10.

Shimomura discloses alicyclic polycarboxylic acid ester base oils which is not among the base oils recited in instant claims 1 and 10.

Schnur discloses polyol esters as necessary base oils in the composition which is not among the base oils recited in instant claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
